

HIGH-PRECISION, HIGH-PRODUCTIVITY
LARGE SIZE MULTI-TASKING TURNING CENTER

SMX

5100L/LB/LS/LSB/XL/XLB

SMX 5100 SERIES

SMX 5100 series is large capacity, (up to 4 metre maximum turning length), multi-tasking turning centers equipped with high power/torque spindles and wide machining areas. The machines are ideal for the complex mill-turn machining of long and large-diameter workpieces typically found in the oil and gas, aerospace, large automotive sectors. SMX 5100 feature thermal compensation systems that minimize thermal deformation and deliver consistently high precision. The machines' ergonomic design, that has taken into account operator convenience and efficient maintenance, provides an optimal solution that meets every customer's requirements.

HIGHER PRODUCTIVITY THROUGH POWERFUL MULTI-TASKING FUNCTIONS

- Complex machining capabilities of left spindle, right spindle, B-axis, milling spindle
- Built-in spindle/high-torque Big bore spindle can be selected according to customer's machining conditions and needs
- High-rigidity machine construction using structural analysis design
- Maximized Y-axis machining area through orthogonal design structure

ENHANCED PRECISION THROUGH HIGH ACCURACY CONTROL FUNCTIONS

- Minimized thermal deformation of the spindle and feed axis using oil cooler
- Adoption of roller LM guideways with highrigidity and high precision
- Equipped with 0.0001° B-axis and C-axis accuracy control function

EASY AND CONVENIENT OPERATION THROUGH AN ERGONOMIC DESIGN

- CUFOS CNC with CPS(Collision protection system), Tool management and additional customized functions
- Wide door and easy spindle accessibility for convenient workpiece loading/unloading
- Side-to-side movable swiveling operation panel with adjustable height
- Convenient ATC operation panel

BASIC STRUCTURE

Optimized orthogonal structure secures a wide working area, easy operation and stability for high precision machining.

Travel

SMX 5100L/LB/LS/LSB

X-axis **910(-30/+880)** mm
35(-1.2/+34.6) inch

Y-axis **520(±260)** mm
20.5(±10.2) inch

Z-axis **3215** mm 126.6 inch

A-axis* **3100** mm 122.0 inch

B-axis **240(±120)°**

SMX 5100XL/XLB * Tailstock/Right Spindle travel

Z-axis **4215** mm A-axis* **4100** mm
165.9 inch 161.4 inch

Rapid traverse rate

	SMX 5100L/LB	SMX 5100LS/LSB	SMX 5100XL/XLB
X-axis	40 m/min (1574.8 ipm)		
Y-axis	40 m/min (1574.8 ipm)		
Z-axis	40 m/min (1574.8 ipm)		30 m/min (1181.1 ipm)
A-axis*	-	14 m/min (551.2 ipm)	-
B-axis	30 r/min (1181.1 ipm)		

Robust design

FEM (Finite Element Method) analysis results in superior machine stability. All guideways are sealed with protective covers. This prevents hot chips and coolant from contacting the guideways, thereby maintaining long-term accuracy.

Feed axis

Best-in-class X-axis travel (910mm) and Y-axis travel (520mm), in addition to the machine's orthogonal design and linear drives deliver speed, precision and flexibility.

High precision roller-type LM guideways

High precision roller type LM guideways minimize non-cutting time through high rapid rates.

COOLING CONCEPT MAINTAINS HIGH ACCURACY OVER LONG MACHINING RUNS

Design and structure reduces thermal error and ensures superior accuracy over long machining runs

Minimization of thermal deformation by oil cooling

Spindle and ball screw core cooling system minimizes thermal deformation during long machining processes and enhances high accuracy performance.

Roundness and surface roughness

By systematically testing individual machine elements and analysing the results, the SMX 5100 series is able to deliver precision and reliability, and high levels of customer satisfaction.

Roundness

5 μm

Material	Aluminium
Tool	Endmill \varnothing 10 mm (TAEGUTEC)
Spindle speed	12000 r/min
Feedrate	300 mm/min

Roundness

0.39 μm

Material	Aluminium
Tool	OD tool (SANDVIK)
Spindle speed	1000 r/min
Feedrate	0.1 mm/rev

** This test is performed in a DN Solutions's test environment.*

Roundness

1.25 μm

Material	Aluminium
Tool	OD tool (SANDVIK)
Spindle speed	1500 r/min
Feedrate	0.1 mm/rev

MACHINING AREA

Orthogonal structure increases machining capacity and the extended turning diameter enables the machining of large size workpieces.

Maximized Y-axis machining area through orthogonal structure design

Maximized Y-axis machining area due to the orthogonal design structure enables the machining of a wide range of workpieces.

Y-axis machining area

520 mm
20.5 inch

Gear skiving solutions

We can help manufacturers dramatically improve their productivity with gear machining solutions such as power skiving, invo-milling and hobbing: all of which enable high-precision external / internal gear machining in a single setup.

** Please contact DN Solutions for further information.*

Max. machining diameter

830 mm
32.7 inch

Max. machining length

SMX 5100L/LB/LS/LSB

3050 mm
120.1 inch

SMX 5100XL/XLB

4070 mm
160.2 inch

Extended machining area

The extended machining area allows for the machining of large diameter workpieces up to 4 metres in length.

CUTTING PERFORMANCE

Powerful and fast machining capability across turning, milling, drilling, tapping and other multi-tasking operations ensures higher productivity and efficiency.

Powerful machining

O.D. cutting

Spindle speed r/min	Cutting speed m/min (ipm)	Feedrate mm/rev	Radial cutting depth mm (inch)	Material removal rate cm ³ /min (inch ³ /min)
253	210 (8267.7)	0.55 (0.0)	8.5 (0.3)	1405 (85.7)

U-drill (milling)

SMX 5100LB/LSB/XLB						

SPINDLE | TAILSTOCK

Machining all angles (C & B-axis)

Machining is mainly done with the Left and Milling spindles. The C-axis of the left spindle and B-axis of the milling spindle, with Y-axis control, create a multi-tasking turning center that can drill, tap and end mill in any angle as well as machine contours to high precision. (5-axis simultaneous machining is an option).

Left/Right spindle

0.0001°

• C-axis positioning control

To enhance C-axis positional accuracy of the left spindle, a position compensation sensor has been adopted. Left and Right spindles can have C-axis positioning control over every 0.0001° in 360°.

• B-axis positioning control precise continuous indexing

B-axis indexing movement every 0.0001° in $\pm 120^\circ$ enables not just horizontal front face machining but also complex angular machining too.

• Emergency braking function

In case of non-scheduled stoppages caused by power outages etc., the braking function protects operators and workpieces.

Swivel and indexing of the B-axis is driven by a servo motor and a roller gear cam, ensuring sufficient rigidity for powerful cutting as well as for high-precision positional control.

Tailstock

Easier and faster set-up of the tailstock using M-code program can be achieved.

Servo driven tailstock

The operator inputs the correct M-code information in the control and the tailstock moves to its proper position automatically through the linear motion control of the servo motor and ball screw. This delivers improved efficiency by reducing set-up times and non-cutting times.

Model	Tail stock travel mm (inch)	Max. quill thrust force kN	Tail stock center
SMX 5100L	3100 (122.0)	15	MT#5 (Built-in type Dead Center)
SMX 5100LB	3100 (122.0)	20

10.4 inch

Servo driven ATC & Tool magazine

The tool magazine capacity can be increased to 120 tools. Tools are selected by the fixed address method that helps reduce changeover times.

ATC operation panel

The status of the ATC and the tool magazine unit can be seen, reviewed and monitored via the touchscreen. The touchscreen is used to operate the ATC, the tool magazine and the tool pot carrier.

ATC magazine information display

The operational status of the ATC magazine, which is difficult to check from outside, can be seen at a glance on 10.4" big screen .

Convenient touchscreen operation

Available buttons are activated according to current and next step operations. In this way complex manual operations are undertaken logically and easily.

Tool magazine monitoring

Tool magazine status can be monitored in real time by a CCTV installed inside the magazine.

ADDITIONAL TOOL MAGAZINE

Optional LBB (Long boring bar) and long tool magazines can enable fast and efficient ID turning and milling of long pipes, tubes and shafts.

Automatic LBB changer package & long tool magazine OPTION

SMX 5100L/LS machines can accommodate workpieces up to 3050mm in length and can machine long tubes such as isolation valves/ pipe lines (Oil/Gas) and landing gear axles (Aerospace) that require center bores. Additional (Optional) Long boring bar/Long tool magazine can reduce machining processes/ cycle times and improve machining capability.

* Drastically reduce LBB set-up time and optimized package for heavy-duty machining on hard materials.
** Drastically reduce LBB set-up time and high productivity package.

Tool magazine for long tool OPTION

ERGONOMIC DESIGN

Maximizes user's convenience by employing an ergonomic design concept.

Ease of machine setup through ergonomic design

By laying out the operation panel and tool magazine in a user-friendly way, tooling and workpiece setup become easier for the operator.

1
Wide door ensures the fast and efficient loading/unloading of workpieces using cranes etc

2
Good operator access to the spindle
Fast and comfortable work set-up

3
Operation panel with side-to-side movement, swivel action and adjustable height

Swivel angle adjustment : 100°
Height adjustment : 190 mm (7.5 inch)
Longitudinal movement : 2615 mm (103.0 inch)

4
Large front window

Enables the operator to easily monitor the machining area and operations using the front window

5
Front-focused maintenance

Device arrangement such as oil supply and gauges help facilitate daily maintenance activities

CUSTOMIZED USER-FRIENDLY FLEXIBLE OPERATION SOLUTIONS

CUFOS is a PC based control system created by DN Solutions. Equipped with intuitive user-friendly functions such as a smart phone screen and easy customization, CUFOS helps to improve operational efficiency and performance for the user.

CUFOS FEATURES

19 INCH TOUCHSCREEN

- Program memory : 2GB (40GB OPTION)
- App-based Interface like smart phone, tablet PC

EASY PROGRAMMING

- Conversational programming
- Sketch cycle : Gear skiving, Gear hobbing, Polygon turning (continuously being added...)
- SSD data server : program file sharing/ managing (CF card/USB/External PC)

EASY SET-UP/OPERATION

- Tool management for SMX
- CPS(Collision protection system)
- Manual viewer
- File manager

EASY MAINTENANCE

- Status monitor
- Alarm guidance
- Maintenance manager
- Easy connection with external S/W (creating additional App.)

CUFOS

for SMX ser.

SKETCH CYCLE

Easy and quick, but powerful programming for complex machining

Sketch cycle is easy-to-use conversational programming software that make a support to code complex shapes and machining processes such as gear skiving, hobbing and polygon turning.

Advantages

- Easy to use even for beginners with conversational programming by advising workpiece shapes, tool information and machining conditions
- Expensive CAM software is not required
- Reduce coding time by up to 70% while minimizing trial and errors
- Enable to utilize the recent high productivity processing program such as gear skiving

Gear skiving

Gear skiving is carried out in 5 axis machines for more flexible and productive gear machining. The complete component can be finished in one machine, which shorten production time and reduce handling and logistics cost.

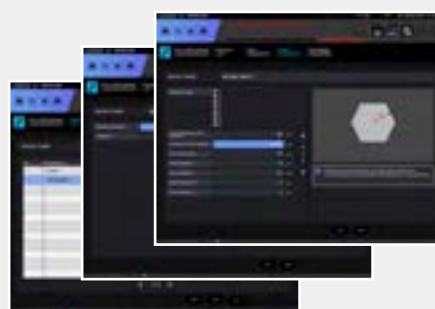

Gear hobbing

Gear hobbing make it easy to proceed gear machining with general turning centers. Gear machining programs can be created by the simple conversational programming so program coding and set-up time can be saved dramatically.

Polygon turning

Polygon turning is a machining process which allows noncircular forms (polygons) to be machine turned without interrupting the rotation of workpieces. It allows rapid production and clean machining of advanced geometries.

EASY SET-UP | OPERATION

Tool management, collision protection between machine unit/ workpiece/tooling and various user guidance provide higher productivity and user-convenience.

Tool management

DN Solutions EZ work tool management

Includes a summary monitoring screen and gives the operator easy access to DN Solutions's own tool management system which provides comprehensive real time data on each tool, such as remaining tool life and status of tool groups.

CPS (Collision protection system)

A function to prevent real-time collision in manual mode between the tool and equipment / machine elements inside the working area.

Use the setup manager with the CPS app to build up the machine model, and add tool, workpiece and workholding equipment details.

File manager

Ability to transfer various type of files including CF cards, USB memory, external PCs and memory inside CUFOS, NC programs between NC memory.

EASY MAINTENANCE

Keeping a machine in best condition through Status Monitoring, Alarm Guidance and Maintenance manager functions.

Status Monitoring

Monitoring various information such as spindle, milling spindle, feed axis, cycle time, program/tool no. on one screen.

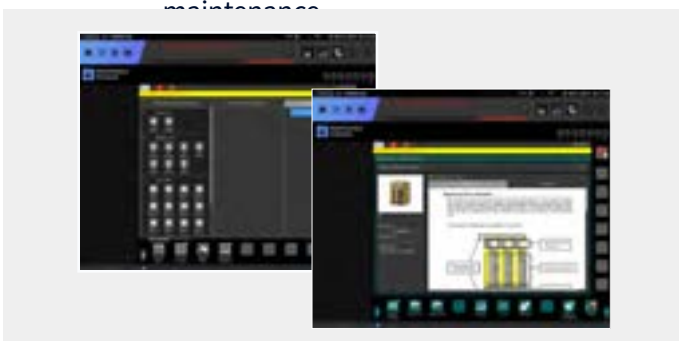

Alarm Guidance

Presenting an operator alarm's causes and troubleshooting guides and sending an email when the alarm last for a long time.

Maintenance manager

Monitors the status of machine and control elements, and confirms the alarm condition and maintenance schedule for preventative maintenance.

 Fire Safety Precautions | There is a high risk of fire when using non-water-soluble cutting fluids, processing flammable materials, neglecting the controlled and careful use of coolants and modifying the machine without the consent of the manufacturer. Always check the SAFETY GUIDELINES carefully before using the machine.

PERIPHERAL EQUIPMENT

Tool setter (Automatic) OPTION

Auto linear motion type tool setter for tool measurement and tool wear detection.

Linear scales OPTION

Linear scales are ideal for high accuracy simultaneous 5-axis machining, high feed precision and machining over long periods of time.

Coolant chiller (Recommendation)

Coolant chiller is highly recommended to prevent temperature rise and minimize thermal deformation, when using a water-insoluble coolant or high-pressure coolant system of which the power is over 1.5 kw.

Servo driven steady rest OPTION

Steady rests support long workpieces during the machining process. Linear positioning of the steady rest is achieved by the servo motor and ball screw and can be positioned in cycle.

Steady rest parking function

When the steady rest is not being used it can be parked under the left chuck.

Size		Type			Parking function (Single)
		Single	Double	Twin	
SLU5.1	Ø85-Ø350 (Ø3.3-Ø3.8)	○	○	○	X
K5.1	Ø100-Ø410 (Ø3.9-Ø16.1)	○	○	○	○ (w/ 15"Chuck)
K6.0	Ø135-Ø460 (Ø5.3-Ø18.1)	○	○	X	○ (w/ 15"Chuck)
K6.1	Ø215-Ø510 (Ø8.5-Ø20.1)	○	○	X	○ (w/ 15",18" Chuck)
RX6.1*	Ø250-Ø685 (Ø9.8-Ø27.0)	○	X	X	○ (w/ 15",18",21" Chuck)

* RX 6.1 requires discussion with DN Solutions

Chip conveyor (Right side exit) OPTION

The conveyor provides a superior chip removal system and has a stable structure for easy maintenance and reduced leakage. By selecting the correct type of conveyor, the efficiency of the machine is increased.

Name	Hinge belt	Magnetic scraper	Drum filter + Hinge scraper (Double type)
Application	For steel	For castings	For steel, castings, nonferrous metal
Features	<ul style="list-style-type: none"> General Appropriate for a heavy material chip of more than 30 mm in length 	<ul style="list-style-type: none"> Easy maintenance Eject the chip by scraping and raising the chip with the scraper 	<ul style="list-style-type: none"> For steel, castings, nonferrous metal Appropriate for both a long and a short chip - Filtering coolant
Shape			

U-axis OPTION

D'Andrea TA-C160(Ø320mm), ID/OD/taper turning in random angles and various surface shapes is possible, while maintaining higher productivity and precise roundness.

The DN Solutions promise, MACHINE GREATNESS, has two important meanings. The first is simple: DN Solutions makes great machines. The second is a challenge to our end-users. With a product line that is this comprehensive, accurate and reliable, we equip our customers to machine greatness. **The big question: *Why should you choose DN Solutions over other options?***

Here's why...

MACHINE GREATNESS™

WHAT YOU MAKE AND HOW YOU MAKE IT MATTERS—SO MAKE IT GREAT WITH DN SOLUTIONS.

UNBEATABLE MACHINES

You won't find a more comprehensive range or a better combination of value, performance and reliability anywhere else.

ROBUST PRODUCT LINE

We offer an impressive range of machine models and hundreds of configurations. Whatever your machining needs and requirements, there's a DN Solutions for you.

READILY AVAILABLE - ANYWHERE IN THE WORLD

Machining centres (including 5-axis machines), lathes, multi-tasking turning centres and mill-turn machines, and horizontal borers with best-in-class specifications are all available...ready to install.

EXPERT SERVICE

Our dedicated, experienced and knowledgeable team is totally committed to improving your productivity, growth and success.

RESPONDING TO CUSTOMERS ANYTIME, ANYWHERE

DN Solutions Global Network

DN Solutions provides systems-based professional support services, before and after the machine tool sale, by responding quickly and efficiently to customers. By supplying spare parts, product training, field service and technical support, we provide the expert care, attention and assistance our customers expect from a market leader.

Global sales and service support network		51	Technical centers Technical center, Sales support, Service support, Parts support

CUSTOMER SUPPORT AND SERVICES

We're there for you whenever you need us.

We help our customers operate at maximum efficiency by providing them with a range of tried, tested and trusted services - from pre-sales consultancy to post-sales support.

Field services

- On-site service
- Machine installation and testing
- Scheduled preventive maintenance
- Machine repair service

Parts supply

- Supplying a wide range of original DN Solutions spare parts
- Parts repair service

Training

- Programming, machine setup and operation
- Electrical and mechanical maintenance
- Applications engineering

Technical support

- Supports machining methods and technology
- Responds to technical queries
- Provides technical consultancy
